

Program Overview

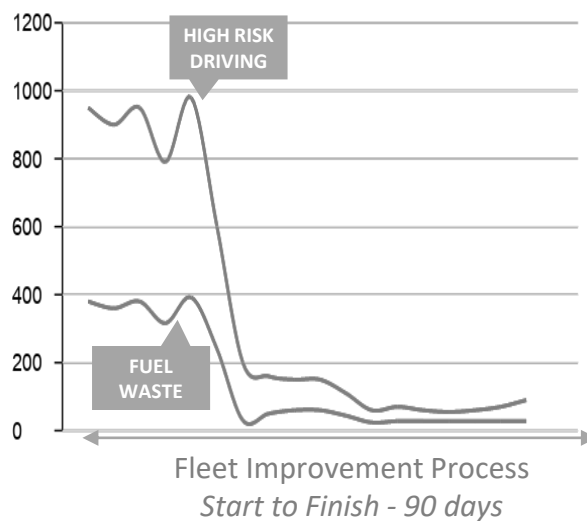

The Fleet Intelligence Program, sponsored by Union Standard Insurance Group, is designed to give you superior visibility into how your fleet is performing on the road so that you can manage it. Across a 30 to 90 day program period, Orion Fleet Intelligence will enable you to address risky and inefficient driving behavior and assess the potential for Orion's products and services to have lasting impact in your unique environment.

During the Program, you will experience first-hand:

- How your drivers are actually operating on the road across a variety of safety and performance metrics
- How Orion's targeted driver coaching leads to improvements in driving behavior
- How Orion's customized reports and analysis are easy for you to put into action

The Program delivers rapid results that can be sustained and enhanced with a fleet-wide deployment.

See
Potential For
Rapid Gains

<p>Improve Safety Reduce high risk driving by as much as 75%</p>
<p>Boost Performance Cut fleet operating costs up to 20%</p>
<p>Visibility & Compliance Get accurate reporting and stop unauthorized usage</p>

What
Makes The
Program So
Successful?

It's Not Just Technology

Driver coaching, monitoring and analysis achieve what GPS technology alone can not. The combination, as a full service, delivers unmatched results.

It's Powerful

Before and after improvement --using your vehicle data, your workflows and your organization-- generates a compelling business case to adopt fleet wide.

It's Easy

Orion's Customer Success Team ensures that realizing the benefits involve minimal effort and oversight from your team. This is all we do, and we do it with vigilance.

Contact
Orion
To Start

To get these same great benefits for your fleet, simply contact an Orion representative and we'll schedule a discussion about the program's details and how to get started.

Agents, reach out to Orion also to learn more about how you can assist your insureds with improving fleet safety and performance.

Powered By

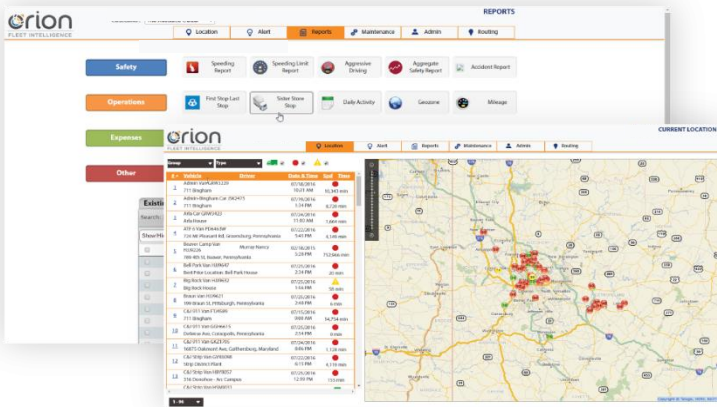

FLEET INTELLIGENCE

Orion Fleet Intelligence proudly delivers fleet management products and services used to control risk, contain costs, and manage daily operations. Orion's hands-on team and distinctive technology sets Orion apart from the competition. Through a combination of vehicle monitoring technology, data analysis, and driver coaching; fleets are able to achieve greater safety and operational improvements. Orion's solutions are deployed nationwide by many of the safest and best performing fleets on the road and recommended by customers, insurance carriers, and their agents. Program features include:

Real-Time Fleet Visibility & Dispatch

Make more informed decisions in daily operations

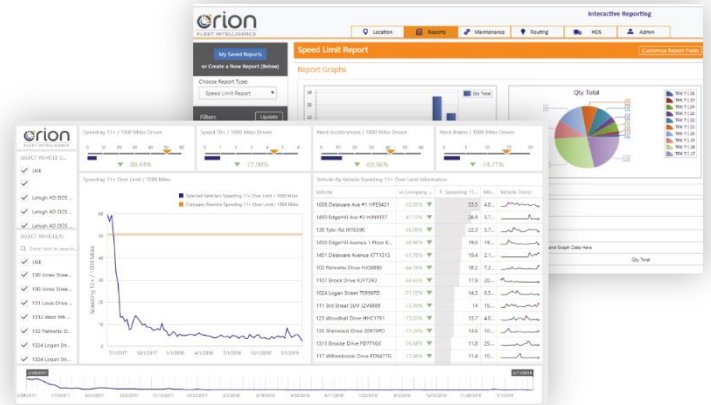

- Live vehicle location and status
- Proximity searching
- Current traffic
- Custom landmarks

Interactive Reporting & Dashboards

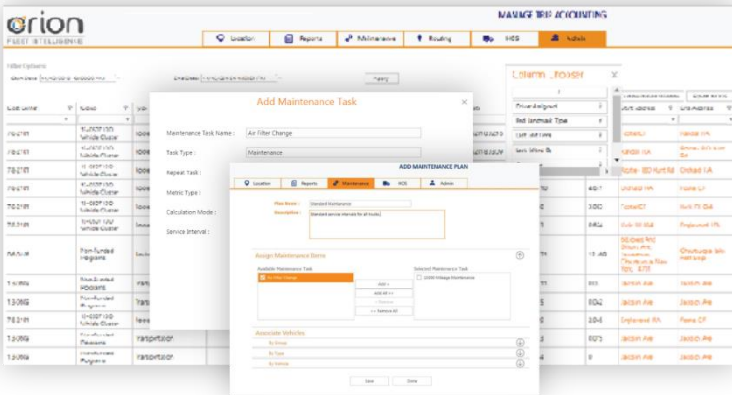

Designed to deliver meaningful and actionable insights

- View and filter performance from an online library of existing reports and dashboards
- Request a custom tailored report or dashboard for your account created by Orion's Data Analysts

Automated Vehicle Reporting & Vehicle Maintenance

- Automated vehicle trip reporting
- Cost center accounting
- Custom maintenance plans
- Tax mileage reporting
- Preventive maintenance reminders
- Maintenance events scheduler

Mobile Apps, Cameras, & More

- Driver Identification
- Temperature Monitoring
- Electronic Log Books
- Passenger Identification
- Route Optimization
- Vehicles Cameras

Stand by your drivers, protect your business, and exceed your safety goals with both real-time and historical visibility into on-road activity. Orion Fleet Intelligence has a connected camera solution for every fleet need, all integrated seamlessly into the MyOrion portal. Camera platforms range from low cost front-facing solutions, 360-degree vision providing both in-cab and on-road visibility, and multi-zone solutions that support multiple interior / exterior cameras. With most solutions supporting easy plug & play self-installation, it has never been easier to get started. Contact Orion today for a camera demo.

Orion Sentry – Front Facing

Orion Sentry is a low-cost, fully connected, forward facing dash camera that offers all the benefits of the Orion telematics solution with the addition of road facing video, in cab audio recording, and audible high-risk driving alerts.

Orion Sentry 360

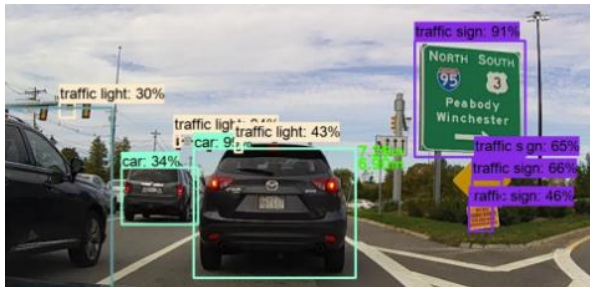

Orion Sentry 360 provides all the benefits of our forward-facing solution with a full 360-degree view in front and inside your vehicle. Remotely view footage from any angle to get the full picture for driver coaching and accident forensics.

Orion Multi-Zone (Interior / Exterior)

Tailor the Orion Multi-Zone solution to address your specific requirements. Camera options include front, in-cab, rear, and side facing exterior and interior cameras,

Orion Sentry 360 (Above) - Maximum Visibility With The Ease of Plug & Play Installation

Orion Smart Vision AI Capabilities

Orion Smart Vision is more than a dash cam. AI processing automatically reviews, analyzes, and reports unsafe situations in real-time through both alerts to management and in-cab audible notifications to drivers. Cameras coach on seatbelt compliance, tailgating, cell phone usage, near accident events, fatigue, and other distractions.
